

I understand that the Consumer Bankers Association is trying to weaken the regulations regarding that govern "No Call" lists.

Since the imposition of Indiana "No Call" we are once again able to have peaceful dinners with our family. We strongly oppose any administrative change that would allow Telephone Spam.

I further would be opposed to any regulation that would allow Bankers, Credit Card Companies etc, to contact me simply because I do business with them.

Further, they should not be able to obtain permission through non-response or by prechecking a box on routine communications such as an invoice.
